21-500 Biała Podlaska ul. Janowska 76

Test bakterie -

imię i Nazwisko:

- | | | |
|--------------------------------------|-----------------------------------|------------------------------------|
| 1. Acinetobacter | 32. Shigella | 63. Enterococcus faecalis |
| 2. Actinomyces | 33. Staphylococcus aureus | 64. Enterococcus faecium |
| 3. Pałeczki Gram | 34. Staphylococcus | 65. Fusobacterium |
| 4. Bacillus megateriu | 35. Streptococcus lactis | 66. Gamella morbillorum |
| 5. Bacillus subtilis | 36. Streptococcus agalaciae | 67. Streptococcus |
| 6. Bordetella pertussis | 37. Streptococcus mutans | 68. Streptococcus B |
| 7. Borrelia burgdorferi | 38. Streptococcus pnemoniae | 69. Mycobacterium abscessus |
| 8. Brucella abortus | 39. Streptococcus pyogenes | 70. Mycobacterium int. |
| 9. Campylobacter | 40. Streptococcus viridans | 71. Okazal |
| 10. Toksyna botulinowa | 41. Cholera | 72. Mycoplasma fermentans |
| 11. Clostridium tetani | 42. Yersinia pestis | 73. Mycoplasma genitalium |
| 12. Clostridium welchii | 43. Bacillus pestis | 74. Mycoplasma hominis |
| 13. Cocci Gram | 44. MRSA | 75. Mycoplasma penetrans |
| 14. Corynebacterium | 45. Bacillus cereus | 76. Mycoplasma salivarium |
| 15. Escherichia coli | 46. Clostridium perfringens | 77. Porphyromonas gin. |
| 16. Gardnerella vaginalis | 47. Enterobacter aerogenes | 78. Prevotella intermedia |
| 17. Haemophilus influenzae | 48. Klebsiella pneumoniae | 79. Propionibacterium |
| 18. Helicobacter pylori | 49. Micrococcus luteus | 80. Proteus mirabilis |
| 19. Legionella pueumophila | 50. Proteus vulgaris | 81. Salmonella enterica |
| 20. Leptospiria | 51. Salmonella enteritidis | 82. Salmonella typhimurium |
| 21. Listeria monocytogenes | 52. Streptococcus mitis | 83. Serratia marcescens |
| 22. Mycobacterium bovis | 53. Borrelia vincent | 84. Staphylococcus |
| 23. Mycobacterium leprae | 54. Clostridium difficile | 85. Stomatococcus |
| 24. Mycobacterium tuberculosis | 55. Mycobacterium | 86. Streptococcus salivarius |
| 25. Mycoplasma | 56. Neisseria catarrhalis | 87. Treponema pallidum |
| 26. Neisseria | 57. Actinomyces | 88. Ureaplasma parvum |
| 27. Neisseria meningitidis | 58. Aggregatibacter act. | 89. Ureaplasma urelyticum |
| 28. Pseudomonas | 59. Bacteroides fragilis | 90. ERK |
| 29. Salmonella | 60. Burkholderia cepacia | 91. VRSA |
| 30. Salmonella paratyphi | 61. Clostridium septicum | 92. Vibrio parahaemolyticus |
| 31. Salmonella typhi | 62. Eikenella corrodens | 93. Vibrio vulnificus |
